

BREW GUIDE: **BONAVITA**

- 1:** Drop in the filter.
- 2:** Weigh the ground coffee into the filter*
- 3:** Weigh the water and pour it into the reservoir*
- 4:** Slide the basket onto the rails.
- 5:** Place the carafe below, and press the button to start
- 6:** Enjoy!

*We suggest you brew with a 1:20 ratio (20 grams of water for every 1 gram of coffee). This is more than we usually recommend but the brewer actually loses a lot of that water you put in the reservoir to steam.
