

BREW GUIDE: CHEMEX & POUROVER

- 1:** Bring kettle to a boil.
- 2:** Weigh coffee using a 1:18 ratio (1 gram of coffee to 18 grams of water).
- 3:** Drop in the filter
- 4:** Rinse the filter with boiled water. Empty water from Chemex.
- 5:** Place brewer on scale and set to zero.
- 6:** Grind coffee and add to filter. Set scale to zero again.
- 7:** Start timer and pour twice as much water as coffee over grounds. (i.e. 18g coffee, 36g water). Pour slowly clockwise.
- 8:** After a minute, add water in stages (about 70-100g at a time) until you reach the final weight of water.
- 9:** Once the drip stalls to every couple of seconds, your brew is finished. Remove filter.
- 10:** Enjoy!
